

MEDICAL POLICY AND PROCEDURES GUIDE

The Somerset Hills School District Policy 5330 states that any medication including over the counter medications, requires a completed order form that includes the following information:

- Parental permission
- Physician's Order - including Medication, Dosage, Route, Time, Side Effects, and Length of Treatment
- Medication must be delivered in the original labeled container to the school nurse by the parent/guardian. Students may not bring medications to school on their person or in his/her backpack.
- Medication forms may be obtained from the school nurse or downloaded from the Health Office website.

* Students may carry and self administer emergency medications such as an inhaler for asthma or an epi-pen for life threatening allergies. These medications require a doctor's order and must indicate permission from the doctor that the student is able to self medicate.
